02

Freelance Designer, Sum Labs/Raise/Missive

I've been freelancing with Silicon Valley startups for the past 4 years. Among those startups I've been able to work with companies aiming to change commercial real estate, healthy living, publishing and gifting. During this time I designed mobile and web apps, marketing sites, presentations, logos, book covers, landing pages, e-mailing templates and more. **A typical day consists of:**

- User behavior analysis
- User persona creation
- Creating graphics & interactions
- Developing advanced wireframes
- Building prototypes and testing hypotheses
- Building new brands for new products
- Mapping out user flows and site structures

- Creating marketing material
- Establishing visual design guidelines
- Creating and delivering consistent iconography
- Presenting to product teams
- Understanding product requirements
- Testing product-market fit
- Communicating with engineers for better workfllows
